The Courts and the People: Friend or Foe?

2021-10-07 DJ Galligan Are the courts our friend or our foe? This book has three parts: Part I considers the case for judicial independence Part II looks at the question 'Is judicial independence under threat?' Part III reflects on whether judicial independence be defended and protected. Prompted by the constitutional crisis following the referendum of 2016, the Foundation for Law Justice and Society convened the second Putney Debates. Now convened on an annual basis, they provide a forum each year for the discussion of matters of constitutional importance. The original Putney Debates were held in St Mary's Church, Putney in 1647. The Civil War had been won, the King was held prisoner, the New Model Army was in control. In late October of that year, the weekly meeting of the High Council of the New Model Army, under the chairmanship of Oliver Cromwell, together with several civilians, turned into a debate about the constitution. This is perhaps the only occasion in modern history that a constitutional convention has been held on the English constitution.

Globalization and Animal Law

2017-05-01 Thomas G. Kelch The rise of the globalized economy has rendered an even more profound change in the relationship between humans and other animals than the ancient progression from huntergatherer to agricultural society. In today's global markets, multinational corporations exploit the economic value of animals throughout the world on an unprecedented scale. The philosophical and legal notions that animals are mere unfeeling machines or pieces of property, although more or less taken for granted for centuries, has been challenged, if not burst asunder, in recent decades (in law, moral philosophy, and cognitive and other sciences), and regulation of the treatment of animals in agriculture, experimentation, entertainment and other areas has begun to make substantial inroads in national and international law. This book provides a detailed analysis of international and comparative animal law focusing on the impact of today's globalized economy on animal law. Describing a wide range of domestic and international laws relating to the treatment of animals, the author explicates the sorts of legal rules which affect the global animal marketplace. Representative norms in existing animal protection laws are analyzed and critiqued, illustrating the diverse approaches taken by different countries and by the international community in regulating uses of animals. Among the issues covered are the following: - contemporary philosophical thought on the relationship between humans and animals; - recent scientific research relating to cognitive and other abilities of animals; - legal issues relating to factory farming and animal slaughter; - legal protection of animals during transport; - regulatory schemes on animal experimentation; - laws on the use of animals in entertainment; - laws on protection of companion animals; - regulation of trade in endangered species; - international trade issues relating to animals, including consideration of the provisions of GATT and the seminal WTO/GATT decisions in the Tuna/Dolphin, Shrimp/Turtle, Tuna Labeling and EU/Seal Products cases; - constitutional protection for the interests of animals; - intellectual property law issues relating to animals; - efforts to have the legal "personhood" of certain animals judicially recognized; and - what the future may hold for animal law in the global economy. To ensure the consideration of a full range of legal approaches, the laws analyzed come from a wide variety of countries and jurisdictions, including Australia, Austria, Brazil, Canada, the EU, Germany, India, Ireland, New Zealand, Switzerland, the UK, and state and federal laws of the US. Numerous international treaties and conventions relevant to animal treatment and animal law are also covered, including the Berne Convention for the Protection of Literary and Artistic Works, the CITES Convention, the European Convention for the Protection of Animals Kept for Farming Purposes, the European Patent Convention, the GATT Treaty, the TRIPS Agreement and the Universal Copyright Convention. It is not difficult to grasp, given the continuing increases in production, consumption and use of animals and animal products worldwide, that legal initiatives in this often emotional and acrimonious area of law are frequently contentious and hard fought. But this is really just the dawn of animal law, which has only recently become recognized as an important cutting-edge topic, and this area of the law promises to develop rapidly in the future. This book is enormously valuable in contributing to the continuing development and understanding of this law, clearly laying out the contours and boundaries of existing animal laws in our global economy, and allowing legal educators, concerned lawyers and policymakers to teach, formulate proposals, argue cases and defenses, and secure a firm purchase on future trends and developments in animal law.

Whose Book is it Anyway?

2019-03-12 Janis Jeffries *Whose Book is it Anyway?* is a provocative collection of essays that opens out the copyright debate to questions of open access, ethics, and creativity. It includes views – such as artist's perspectives, writer's perspectives, feminist, and international perspectives – that are too often marginalized or elided altogether. The diverse range of contributors take various approaches, from the scholarly and the essayistic to the graphic, to explore the future of publishing based on their experiences as publishers, artists, writers and academics. Considering issues such as intellectual property, copyright and comics, digital publishing and remixing, and what it means (not) to say one is an author, these vibrant essays urge us to view central aspects of writing and publishing in a new light. *Whose Book is it Anyway?* is a timely and varied collection of essays. It asks us to reconceive our understanding of publishing, copyright and open access, and it is essential reading for anyone invested in the future of publishing.

The Future of Mental Health, Disability and Criminal Law

2023-09-15 Kay Wilson This book brings together contributions from twenty-three world-leading scholars and commentators that address a range of contemporary and pressing international themes in mental health, disability and criminal law. The authors use the work of internationally renowned academic, Emeritus Professor Bernadette McSherry, as a springboard to reflect on recent developments in these areas of law and to anticipate the future directions they may take. In doing so, they aim to inform and inspire a new generation of mental health, disability and criminal law scholars, advocates and reformers. The book is divided into four substantive sections: reforming mental health and disability law; regulating coercion and restrictive practices; improving access to justice and the criminal law; and transforming mental health law. It also includes an introduction from the editors and an afterword from Emeritus Professor McSherry. The book is aimed at regulators, policymakers, lawyers, clinicians, consumer advocates and academics who are interested in the urgent and contentious issues surrounding the reform and development of mental health, disability and criminal law. It will help them understand the key issues and problems and presents suggestions for reform. The book is interdisciplinary and international in its focus.

The Subjugation of Canadian Wildlife

2018-04-10 Max Foran Hardly a day goes by without news of the extinction or endangerment of yet another animal species, followed by urgent but largely unheeded calls for action. An eloquent denunciation of the failures of Canada's government and society to protect wildlife from human exploitation, Max Foran's *The Subjugation of Canadian Wildlife* argues that a root cause of wildlife depletions and habitat loss is the culturally ingrained beliefs that underpin management practices and policies. Tracing the evolution of the highly contestable

assumptions that define the human-wildlife relationship, Foran stresses the price wild animals pay for human self-interest. Using several examples of government oversight at the federal, provincial, and territorial levels, from the Species at Risk Act to the Biodiversity Strategy, Protected Areas Network, and provincial management plans, this volume shows that wildlife policies are as much - or more - about human needs, priorities, and profit as they are about preservation. Challenging established concepts including ecological integrity, adaptive management, sport hunting as conservation, and the flawed belief that wildlife is a renewable resource, the author compels us to recognize animals as sentient individuals and as integral components of complex ecological systems. A passionate critique of contemporary wildlife policy, *The Subjugation of Canadian Wildlife* calls for belief-change as the best hope for an ecologically healthy, wildlife-rich Canada.

Orca

2018-05-01 Jason M. Colby Since the release of the documentary *Blackfish* in 2013, millions around the world have focused on the plight of the orca, the most profitable and controversial display animal in history. Yet, until now, no historical account has explained how we came to care about killer whales in the first place. Drawing on interviews, official records, private archives, and his own family history, Jason M. Colby tells the exhilarating and often heartbreaking story of how people came to love the ocean's greatest predator. Historically reviled as dangerous pests, killer whales were dying by the hundreds, even thousands, by the 1950s--the victims of whalers, fishermen, and even the US military. In the Pacific Northwest, fishermen shot them, scientists harpooned them, and the Canadian government mounted a machine gun to eliminate them. But that all changed in 1965, when Seattle entrepreneur Ted Griffin became the first person to swim and perform with a captive killer whale. The show proved wildly popular, and he began capturing and selling others, including Sea World's first Shamu. Over the following decade, live display transformed views of *Orcinus orca*. The public embraced killer whales as charismatic and friendly, while scientists enjoyed their first access to live orcas. In the Pacific Northwest, these captive encounters reshaped regional values and

helped drive environmental activism, including Greenpeace's anti-whaling campaigns. Yet even as Northwesterners taught the world to love whales, they came to oppose their captivity and to fight for the freedom of a marine predator that had become a regional icon. This is the definitive history of how the feared and despised "killer" became the beloved "orca"--and what that has meant for our relationship with the ocean and its creatures.

Competition Law in Slovenia

2020-09-22 Andrej Fatur Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of competition law and its interpretation in Slovenia covers every aspect of the subject- the various forms of restrictive agreements and abuse of dominance prohibited by law and the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies and criminal penalties; and raising challenges to administrative decisions. Lawyers who handle transnational commercial transactions will appreciate the explanation of fundamental differences in procedure from one legal system to another, as well as the international aspects of competition law. Throughout the book, the treatment emphasizes enforcement, with relevant cases analysed where appropriate. An informative introductory chapter provides detailed information on the economic, legal, and historical background, including national and international sources, scope of application, an overview of substantive provisions and main notions, and a comprehensive description of the enforcement system including private enforcement. The book proceeds to a detailed analysis of substantive prohibitions, including cartels and other horizontal agreements, vertical restraints, the various types of abusive conduct by the dominant firms and the appraisal of concentrations, and then goes on to the administrative enforcement of competition law, with a focus on the antitrust authorities' powers of investigation and the right of defence of suspected companies. This part also covers voluntary merger notifications and clearance decisions, as well as a description of the judicial review of administrative decisions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Slovenia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of international and comparative competition law.
