Numerous Northstar engine operators also report troubles with head gaskets, which can cause overheating problems and result in expensive repairs.

Specifically, the Northstar engine models from 1993 to 2005 have been reported to have seepage issues, cracked seals, broken head gaskets, additional oil loss, broken valve cover, faulty water pumps, and carbon buildup. These problems are not significant, but the expense to resolve the troubles was substantially larger than the majority of other engines because of the detailed engineering.
